COMPANY PROFILE

Who we are

People. Process. Technology.

AXITEQ is a managed IoT and digital transformation company. We design, deploy and operate intelligent systems for enterprises, and we take full accountability for the outcome. We don't hand you a dashboard and walk away.

Businesses were investing in technology without getting operational results. Hardware was installed and dashboards were built, yet operations still ran on spreadsheets and firefighting. AXITEQ was founded in Islamabad in 2019 to change that, by owning the whole chain from sensor to 24/7 operations. Today we are active in Denver (USA), Riyadh (KSA) and Islamabad (PK).

2019

Founded

3

Countries

7

IoT platforms

24/7

NOC operations

01 Our foundation

People

Engineers and operators who own the outcome, not just the delivery.

Process

Proven methods from survey to pilot to 24/7 operations.

Technology

Our own platforms, open standards and AI where it adds value.

02 How we deliver

01

Survey

Sites, assets and the outcome you need.

02

Pilot

Proven on real assets in weeks.

03

Scale

Rolled out region by region.

04

Operate

Run by our 24/7 NOC, improving every month.

What we build

Seven platforms. Six service lines. One accountable partner.

03 Platforms

AxiOS

Unified operations intelligence and 24/7 NOC

FleetOS

The connected fleet operating system

Energy as a Service

Solar, battery, DG and grid intelligence, zero capex

Waste Management System

Smart bins, route optimization and compliance

Delivery Management System

Last-mile orders, riders and live tracking

Home Automation

Lighting, climate, security and media in one app

Guided Parking System

Occupancy sensing and LED guidance

04 Services

IoT & Industrial IoT

Sensors, edge, connectivity and cloud

Industrial Automation

PLC, SCADA, RTU and switchgear

Digital Transformation

Process redesign, integration, change

Web & Mobile Development

Platforms, portals and native apps

Digital Signage

Video walls, LED, kiosks and CMS

Resource Augmentation

Offshore specialists: remote, hybrid, onsite

Where we work

Industries that cannot afford downtime.

05 Industries

Manufacturing & Industrial

Predictive maintenance, OEE monitoring, energy optimization and PLC/SCADA control.

Retail & Cold Chain

Temperature monitoring, refrigeration management and compliance across multi-site chains.

Telecom Infrastructure

BTS tower monitoring, data center operations, solar sites and remote NOC.

Energy & Utilities

Solar plant monitoring, grid management and Energy as a Service at enterprise scale.

Healthcare

Medical imaging platforms, remote patient monitoring and clinical infrastructure.

Smart Buildings & Campuses

Home automation, guided parking, digital signage and building operations.

Fleet & Logistics

Connected fleet operations, delivery management and SIM/eSIM connectivity intelligence.

"We sell outcomes, not components."

Hardware, connectivity, platform and 24/7 operations, bundled into one managed service with clear SLAs.
