

Guided Parking System

From entry to space, a seamless parking experience.

01 Overview

A complete guided parking system that removes the inefficiency of traditional parking facilities. Drivers are guided from the entrance to the nearest available space using LED display guidance, reducing congestion, improving the visitor experience and maximizing facility revenue.

Less circling

Drivers go straight to a free space.

Higher revenue

Every space used, every visit billed.

Better visitor experience

Clear guidance from entry to exit.

02 Key capabilities

Occupancy detection

Overhead sensors detect every space in real time.

LED guidance

Directional signage to the nearest free space.

Entry, exit & payment

Automated ticketing and payment.

Operator console

Management console for facility operators.

Analytics

Occupancy analytics and revenue reporting.

Any scale

Scales to any size of parking facility.

03 System components

**Sensors**
Space occupancy detection

**LED displays**
Real-time directional guidance

**Payment**
Automated ticket and payment systems

**Management**
Operator console and analytics

04 Architecture

**Sensors**Overhead occupancy sensors · Per-space indicators

**Network**Zone controllers · Facility network

**Guidance**LED directional displays · Level and zone counters

**Access**Entry and exit automation · Payment systems

**Console**Operator management console · Occupancy analytics

**Revenue**Revenue reporting · Usage trends

05 Technical specifications

SENSING	Overhead space-occupancy sensors
GUIDANCE	LED directional signage with live free-space counts
ACCESS & PAYMENT	Entry, exit and payment automation
MANAGEMENT	Operator console, occupancy analytics, revenue reporting
SCALE	Any size of facility, from one level to multi-storey
DELIVERY	Hardware, software and managed service from AXITEQ

06 Where it fits

Shopping malls

Airports

Hospitals

Corporate campuses
